

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Original) A track cover, comprising:

a. an elongated body capable of partially covering the top and opposite side sections and the side opening of a track on a track vehicle, said elongated body including a lower edge;

b. a durable mat attached to said lower edge on said elongated body; and,

c. a plurality of elastic straps used to attach said elongated body over the top and side surfaces of the track on the track vehicle when said elongated body is placed over the track.

2. (Previously Presented) The track cover, as recited in Claim 1, further including a protective belt attached to the perimeter edges of said elongated body.

3. (Currently Amended) The track cover, as recited in Claim 2, further including at least one pleat formed on said elongated body that enable said elongated body to adjust conform in size and shape to the track on a track vehicle.

4. (Original) The track cover, as recited in Claim 1, wherein said elongated body includes an upper section that partially extends over the top surface of the track on a track vehicle.

1 5. (Original) The track cover, as recited in Claim 1, wherein said elongated body is made of
2 vinyl.

3

4 6. (Original) The track cover, as recited in Claim 5, wherein said vinyl is 18 oz.

5

6 7. (Currently Amended) The track cover, as recited in Claim 2, further including a cut out
7 area formed on the lower edge of said elongated body, in which the perimeter edge of said
8 mat extends.

9

10 8. (Original) The track cover, as recited in Claim 1, wherein said mat is made of rubber.

11

12 9. (Original) The track cover, as recited in Claim 1, further including a plurality of D-rings
13 attached to the perimeter edge of said elongated body that connect to said elastic straps to
14 hold said elongated body over the track.

15

16 10. (Original) The track cover, as recited in Claim 1, wherein said elongated body includes
17 an elevated center axis that enables said elongated body to be used on a track with an
18 elevated center axis.

19

20 11. (Withdrawn) The track cover, as recited in Claim 1, further including slots formed on
21 said elongated body to allow structural members to extend through said elongated body when
22 attached over the track.

23

1 12. (Previously Presented) A track cover, comprising:

2 a. an elongated body capable of fitting over the track of a track vehicle, said

3 elongated body including an upper section, a middle section, and two opposite side sections;

4 b. a belt is sewn to the perimeter edges of said upper section, said middle section

5 and said side sections;

6 c. a mat is attached to the lower edge of said elongated body;

7 d. a plurality of D-rings are attached to the perimeter edges of said elongated

8 body; and,

9 e. a plurality of elastic straps that connect at one end to said D-rings and extend

10 across the tracks and connect to the inside edges of said track to hold said elongated body

11 over a track.

12

13 13. (Original) The track cover, as recited in Claim 12, further including a belt attached to the

14 perimeter edges of said elongated body.

15

16 14. (Previously Presented) The track cover, as recited in Claim 12, further including at least

17 one pleat formed on said elongated body that enables said elongated body to adjust in size

18 and shape to the track on a track vehicle.

19

20 15. (Original) The track cover, as recited in Claim 12, wherein said elongated body is made

21 of vinyl.

22

23 16. (Original) The track cover, as recited in Claim 12, wherein said vinyl is 18 oz.

1 17. (Original) The track cover, as recited in Claim 12, further including a cut out area
2 formed on the lower edge of said elongated body, in which the perimeter edge of said mat
3 extends.

4

5 18. (Original) The track cover, as recited in Claim 12, wherein said mat is made of rubber.

6

7 19. (Original) The track cover, as recited in Claim 12, wherein said elongated body includes
8 an elevated center axis that enables said elongated body to be used on a track with an
9 elevated center axis.

10

11 20. (Withdrawn- currently amended) A method for preventing debris from the tracks on a
12 track ~~work~~ ~~construction~~ vehicle from falling onto the roadway when transporting the
13 ~~construction~~ track vehicle on a trailer on the bed of a transport vehicle comprising the
14 following steps:

15 a. selecting at least one track cover that includes an elongated body that fits over
16 the track on a track vehicle, said elongated body being sufficient in size and shape to over the
17 side opening on the track, said elongated body including a longitudinally aligned mat
18 attached to a lower perimeter edge;

19 b. positioning the track over cover on the trailer or bed of a transport vehicle so
20 that said mat is longitudinally aligned on the trailer or bed of a transport vehicle and by
21 driven upon by the track of a track vehicle when the track vehicle is transported on the trailer
22 or bed of a transport vehicle, and said elongated body being disposed over the side of the
23 ~~trailer or bed, the track~~;

1 c. extending said elongated body over the side opening and the top surface of the
2 track located on said mat; and,

3 d. securely attaching said elongated body over the track of the track vehicle.
